Nour Harahsheh

Software Engineer, Munich

nour.fwh@gmail.com – github.com/n0ur – linkedin.com/in/nourhrs

Professional Experience *full time*

Experteer GmbH   May 2015 - Present

At Experteer (career platform for professionals) I worked on frontend-heavy projects using AngularJS and Rails for the backend. For other projects I worked with Elasticsearch, writing queries and indexing data. My daily tasks include doing code reviews, maintaining and refactoring old code and bug fixing.

trbo GmbH   Feb 2014 - May 2015

trbo works with online shops to help increase their revenue with user engagement. My daily tasks ranged from writing SQL queries that made sense of big raw data, to fixing CSS bugs. I set up and maintained different testing environment on different servers and along with the team implemented new features for the product, mostly using PHP Zend Framework and Node.js.

Internships & part time positions

Dakwak, Inc.   Oct 2012 - Mar 2013

Dakwak is a website translation platform. During my time there I wrote tests using RSpec, worked on the translation API and built the Ruby wrapper gem for it, wrote posts for the company's official blog and refactored the frontend for the company's website.

TootCorp   Jul 2012 - Sep 2012

At TootCorp I worked on Ikbis (a media sharing platform for the middle east) and built with another colleague a photo sharing website from scratch. I used Ruby, Ruby on Rails, MongoDB, JavaScript and HTML/CSS.

Education

Jordan University of Science and Technology
Bachelor's degree of Computer Science [2009 - 2013]
Percentage Grade 84.5 (Excellent)

Recommendations

"Nour is a very responsible, smart developer and a fast learner. She approaches tasks thoroughly and carries them through to the end. It was a pleasure to work with Nour, as she's a team player and often gave great hints and valuable feedback. I regret we're not in the same company any more. Highly recommended!

Konstantin Pogorelov
Senior Software Developer at Jochen Schweizer

"Nour has done her three month training at TootCorp, she was very dedicated to work, more than any other university trainee we ever had. She is smart and a fast learner, she worked on Ikbis and other projects and managed to learn the frameworks and languages really fast.

George Akra
CEO of TootCorp

"Nour is an extraordinary student who always goes beyond expectations. I had the opportunity to supervise her graduation project at JUST, she successfully completed a complex project that required the integration of many components. She got an excellent feedback from the committee who evaluated the project and considered among the top 5% of the students.

Yaser Jararweh
Assistant Prof. Computer Science, Jordan University of Science and Technology

Interests

In July 2016 I participated in a summer school program at Utrecht University titled *Applied Functional Programming in Haskell* which I enjoyed very much! These days I spend my free time learning about functional programming and Haskell, I find that process very rewarding. I am also interested in Non Relational databases and data aggregations, as I use MongoDB for some personal projects.
